

Eagle Ridge United Church
Casual Ministry

Investigate Heat Capture from Attic		Number P007	Date Posted: Sept. 20/10
Category Property & Maintenance - Indoor		Type Project	
Description The church has a large amount of attic space through which the hot water heating pipes run. Although most of these pipes are insulated there is a huge amount of heat build-up in the insulated attics. We are looking for someone to investigate whether this heat could be captured and used to heat the sanctuary. There is a largely unused heat exchange system in the attic which may be able to be converted into a fan system to blow the hot air out of the attic and into the sanctuary, thus saving on our very high heating costs.			
Importance	Medium		
Time estimated to complete job	10 hours		
Special skills required			
Special tools required			
Budget	\$0		
Contact person	Dave Anderson		
Additional Notes			

Casual Ministry Response Form

Fill out, detach this form and turn it in at the office, or put it in the offering plate. Take home the top portion for your information.
